Host:	Cement Concrete & Aggregates Australia (CCAAS) and Institute of Quarrying Australia (IQA)
Date:	Friday 2 August, 2013
Venue:	Le Montage, Sydney
Attendees:	262
Sponsorship:	13

The Client

The Institute of Quarrying Australia (IQA) and Cement, Concrete and Aggregates Australia (CCAAS) joined forces in 2006 to hold the first CMIC Conference. ICE Australia has managed each of the Biennial Conferences since 2006 and was asked to manage the CMI EH&S NSW Awards Dinner in 2013. The dinner provided an opportunity for key industry leaders and decision makers to gather and celebrate outstanding achievement and innovation across the industry.

Awards Dinner Objectives:

The EH&S Awards allow an opportunity for CCAAS members and associate members, individuals and companies, to showcase and promote innovations and best practice in Environment and Health and Safety.

Key Achievements

There were a number of major achievements, including:

- While previous awards were organised in-house, ICE Australia was able to take on the management and produce a highly successful event. As a result ICE Australia has been reappointed to manage the 2014 Awards Dinner.
- Le Montage was engaged as a new venue in 2013 and was so well received that the 2014 and 2015 dinners have already been locked in.
- A display area of 18 sponsored trucks offered a unique and special start to the evening as this space was used for pre-dinner drinks and canapés.
- Partners were for the first time invited to attend the dinner and marketing was particularly focused around enhancing this
