ICE AUSTRALIA  
INTERNATIONAL CONFERENCES & EVENTS

## The Client

This annual conference is hosted by a committee representing all nine registered training organisations. These are the Australian government's providers of training to GP registrars to become registered GPs, recognised by the Royal Australian College of General Practitioners and the Australian College of Rural and Remote Medicine.

The overall management was overseen by an Organising Committee made up of GP Synergy staff. Monthly meetings were attended by members of the Organising Committee.

## About the Conference

This is the first GPTEC managed by ICE. This conference was previously managed by other PCOs and then in-house. The annual conferences are held in major cities across Australia on a rotation basis by the nine RTOs.

The conference was held in Sydney's new International Convention Centre. The venue was selected prior to ICE's appointment, although ICE assisted in the review of the venue contract prior to signing.

## Conference Program

The conference comprised of two full-day program and two social functions, with the Welcome Reception held the evening prior to the conference opening. A number of group meetings were also held in conjunction with the conference but were organised directly by the meeting planners.

The four keynote speakers were selected through a deliberation process spanning a number of months, whereas the other speakers were selected from the abstract submission process.

The program included:

- 2 day program
- Welcome Reception
- 23 Session Streams
- Conference Dinner

## The Role of International Conferences and Events Australia

ICE was involved in all elements of the conference, except for the sourcing of the conference venue. ICE was also responsible for sourcing supplier quotes and managed the conference budget, with an updated copy presented to the client on a monthly basis.

Monthly meetings were attended both by the Organising Committee and ICE members with ICE providing progress reports on the different elements of the conference planning process.

## Key Achievement

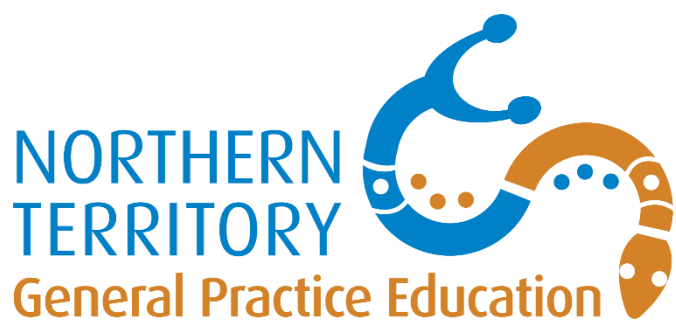

The conference exceeded the target number of attendees by 33%, producing a very healthy surplus of \$90,000 which is more than double the projected surplus.
